

HOTEL ÁNFORA IBIZA

Corporate Sustainability and Environmental Responsibility Policy

Welcome to the other Ibiza

The Island of Ibiza

The island of **Ibiza**, in the Mediterranean Sea, is renowned for its natural beauty, crystal-clear beaches, and a **temperate Mediterranean climate** with warm summers and mild winters. While this makes it a popular tourist destination, it also poses challenges for **sustainability** and **environmental conservation**.

Climate change is increasing temperatures and reducing rainfall in Ibiza, causing **extreme weather** events such as more intense droughts and a higher risk of **forest fires**, affecting both local ecosystems and the availability of water resources.

UNIQUE LOCATION

HOTEL ÁNFORA IBIZA IS A **4-STAR HOTEL** LOCATED IN THE PICTURESQUE TOURIST CENTRE OF **ES CANAR** ON THE EAST COAST OF IBIZA, JUST A FEW KILOMETRES FROM THE CHARMING VILLAGE OF **SANTA EULÀRIA DES RIU**. THIS ANCIENT FISHING VILLAGE IS NOW A POPULAR DESTINATION DUE TO ITS COMBINATION OF MODERNITY AND TRADITION, REFLECTING THE ESSENCE OF AUTHENTIC IBIZA.

SURROUNDED BY BEACHES WITH CRYSTAL-CLEAR WATERS SUCH AS **CALA NOVA**, **CALA MARTINA** AND **CALA LLENYA**, AS WELL AS ICONIC ATTRACTIONS SUCH AS THE FAMOUS **HIPPY MARKET IN PUNTA ARABÍ**, THE HOTEL OFFERS AN IDEAL ENVIRONMENT FOR BOTH FAMILIES AND COUPLES. WITH ITS MODERN, RENOVATED DESIGN, THE **HOTEL ÁNFORA** PROVIDES A UNIQUE EXPERIENCE IN A RELAXED ATMOSPHERE, WHERE HOSPITALITY AND COMFORT ARE GUARANTEED.

ANFORA

ES CANAR | HOTEL | IBIZA

At Hotel Ánfora, we are **deeply committed** to **sustainability** and **caring for the environment**. Our responsible management covers the areas of **energy, water, materials, food and waste**, where we implement effective practices to minimise our environmental impact.

Through a **proactive and responsible approach**, we monitor and optimize our processes to ensure the **efficient use** of resources and promote a harmonious relationship with nature. We believe that every small effort counts, and we are committed to **contributing** to a **more sustainable future**, where our guests can enjoy a unique experience in a preserved and healthy environment.

ENVIRONMENTAL PROBLEMS IN IBIZA

- **Overexploitation of water resources:** Intensive tourism places a heavy strain on limited drinking water resources after years of drought.

- **Increase in marine pollution:** Especially due to single-use plastics and waste on beaches.

- **Loss of biodiversity:** Marine ecosystems, such as *Posidonia oceánica*, are endangered by pollution and unregulated ship anchoring.

- **Population growth:** Increased construction and urban pressure are transforming natural areas.

- **Waste management:** The volume of waste generated and the need to improve recycling highlight the challenge of sustainability management on the island.

Some of our sustainable initiatives

- **Paper Reduction:** We are committed to reducing paper usage across all areas of our operations. This is a key performance indicator within our ISO 9001 and ISO 14001 management programs.
- **Circularity:** We reuse and repurpose materials whenever possible. At the end of each season, textiles are recycled through specialized ONG partners.
- **Local Products:** Local suppliers play an essential role in our food and beverage offer. Like us, they strive to obtain certifications that demonstrate their commitment to sustainability. We also focus on seasonal products whenever possible.
- **Zero Waste:** We promote bulk purchasing at all levels and minimize waste and leftovers by aligning procurement closely with actual needs. Our dinner service is offered à la carte, which allows us to better anticipate customer demand and significantly reduce food waste.
- We provide **parking spaces** for **electric** and **hybrid** vehicles, as well as **bike-friendly** facilities.
- **Vertical Gardens:** We have created vertical gardens using recycled materials, enhancing the beauty and freshness of our surroundings while contributing to sustainability through reduced CO₂ emissions and lower ambient temperatures.
- **Water:** We have installed a water recovery system to minimize water consumption and encourage the responsible use of this valuable resource.

Some of our sustainable initiatives

- **Natural Amenities:** Our bath products contain natural formulas and come in Eco Pump packaging, reducing plastic use and CO₂ emissions.
- **Renewable Energy:** With the installation of 176 photovoltaic panels, we generate electricity from a renewable source, our sun, helping to reduce our carbon footprint.
- **Green Options:** We offer our guests the opportunity to contribute to environmental protection by saving water and energy. Guests can choose not to have their rooms cleaned daily and can limit towel and bed linen changes during their stay.
- **Sustainable Furniture:** Our sun loungers and terrace furniture are made from wood and marine-grade fabrics, minimizing the use of water and chemical products for maintenance.
- **Efficient Lighting:** We use LED lighting and motion sensors to optimize energy consumption in guest rooms and common areas.
- **Active Recycling:** We implement an internal recycling program across all hotel departments, promoting waste reduction and responsible resource management.

Our certifications

HOTEL ANFORA IBIZA

In **2024**, we achieved **ISO 14001** certification, which underscores our dedication to environmental management and sustainability. This certification allows us to implement and continue with more efficient and responsible practices, contributing to the care of the environment and reinforcing our commitment to sustainable development.
